Project Design Phase-II
Data Flow Diagram & User Stories

Date	22 September 2026
Team ID	
Project Name	An employee requests installation of licensed software through the service catalog
Maximum Marks	4 Marks

Data Flow Diagrams:

The Data Flow Diagram represents how an employee submits a licensed software request through the Service Catalog, how the request moves through approval and IT fulfillment, and how the system maintains request and license information until the software installation is completed.

User Stories :

User Stories – Licensed Software Request

Project: **An Employee Requests Installation of Licensed Software through the Service Catalog**

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Software Catalog	USN-1	As an employee, I can view the available licensed software in the Service Catalog.	Available software options are displayed and the employee can select the required software.	High	Sprint-1
	Software Catalog	USN-2	As an employee, I can view software details such as software name, version, description and license information.	Software details are displayed before the request is submitted.	Medium	Sprint-1
	Request Submission	USN-3	As an employee, I can submit a request for licensed software through the Service Catalog.	The request is submitted successfully and a request number is generated.	High	Sprint-1
	Request Submission	USN-4	As an employee, I can provide business justification, department, device and software requirements.	All mandatory fields must be completed before submission.	High	Sprint-1
	Request Tracking	USN-5	As an employee, I can track the status of my software request.	Statuses such as Submitted, Pending Approval, Approved, In Progress and Completed are visible.	High	Sprint-1
	Notifications	USN-6	As an employee, I can receive notifications when my request is submitted, approved, rejected or completed.	A notification is sent whenever the request status changes.	Medium	Sprint-2
Manager / Approver	Approval	USN-7	As a manager, I can review an employee's licensed software request.	Employee details, requested software and business justification are visible.	High	Sprint-1
	Approval	USN-8	As a manager, I can approve or reject a software request.	The request status changes to Approved or Rejected based on the decision.	High	Sprint-1
	Approval	USN-9	As a manager, I can provide comments when approving or rejecting a request.	Approval or rejection comments are stored with the request.	Medium	Sprint-2
IT Support Team	Fulfillment	USN-10	As an IT support member, I can view approved software installation requests assigned to my team.	Relevant assigned requests are available for fulfillment.	High	Sprint-1
	Fulfillment	USN-11	As an IT support member, I can install the approved licensed software on the employee's device.	The requested software is installed successfully on the specified device.	High	Sprint-2
	Fulfillment	USN-12	As an IT support member, I can update the installation status and add work notes.	Installation progress and work notes are saved in the request record.	High	Sprint-2
	Fulfillment	USN-13	As an IT support member, I can mark the request as completed after successful installation.	The request changes to Completed and the employee is notified.	High	Sprint-2
License Management Team	License Management	USN-14	As a license manager, I can check the availability of licenses for requested software.	License availability is visible before fulfillment.	Medium	Sprint-2
	License Management	USN-15	As a license manager, I can update license availability after software installation.	License information is updated after a license is assigned.	Medium	Sprint-2
ServiceNow Administrator	Request Management	USN-16	As an administrator, I can configure the licensed software Service Catalog item.	The catalog item contains required fields, software options and instructions.	High	Sprint-1
	Workflow Automation	USN-17	As an administrator, I can configure the approval workflow for software requests.	Submitted requests are automatically routed to the appropriate approver.	High	Sprint-1
	Assignment	USN-18	As an administrator, I can configure automatic assignment of approved requests to the IT Support Team.	Approved requests are automatically assigned to the correct IT group.	High	Sprint-2
	Notifications	USN-19	As an administrator, I can configure notifications for important request status changes.	Notifications are triggered for submission, approval, rejection and completion.	Medium	Sprint-2
	Reporting	USN-20	As an administrator, I can view reports of software requests and their statuses.	Reports display request volume, status, approvals and completed installations.	Medium	Sprint-3

Project Flow: Employee → Service Catalog → Submit Request → Manager Approval → IT Support → Software Installation → Update Status → Employee Notification
