Project Name	An employee requests installation of licensed software through the service catalog
Maximum Marks	2 Marks

Problem – Solution Fit :

The problem is the difficulty in requesting, approving, tracking, and installing licensed software through manual processes. The proposed ServiceNow Service Catalog solution provides a centralized and automated process for submitting requests, obtaining approvals, assigning IT tasks, tracking status, and completing software installation efficiently.

Purpose :

- The purpose of the solution is to provide a centralized, automated, and trackable process for requesting, approving, and installing licensed software through the ServiceNow Service Catalog.
- Centralized Requests – All software requests are submitted through one Service Catalog.
- Easy Request Process – Employees can select the required software and provide necessary details.
- Automated Approval – Requests can be automatically routed to the appropriate manager.
- Faster IT Assignment – Approved requests can be automatically assigned to the IT Support Team.
- License Verification – IT/License teams can verify license availability before installation.
- Status Tracking – Employees can track their request from submission to completion.
- Notifications – Employees receive updates about submission, approval, rejection, and completion.
- Reduced Manual Work – Automation reduces emails, calls, and manual follow-ups.
- Better Security – Only authorized users can request, approve, or fulfill software installations.
- Request History – ServiceNow maintains a record of requests, approvals, tasks, and updates.
- SLA Monitoring – IT teams can monitor the time taken to complete software requests.
- Better Software Governance – Helps ensure that licensed and authorized software is installed.

Empathy Map – An Employee Requests Installation of Licensed Software through the Service Catalog

Understanding the user, their needs, pain points, and expectations to design a better ServiceNow solution.

Define (CS – In the CS)

1. Customer Segment(s) — CS

Who is your customer?

- Employees of the organization who need to install licensed software on their device.

Key segments:

- Full-time employees
- Contractors / Temporary staff (if applicable)
- Department-wise users (e.g., Developers, HR, Finance, etc.)

6. Customer Constraints — CC

What constraints prevent your customers from taking action or limit their choices?

- Lack of technical knowledge to fill the request form.
- Delays in manager approval.
- Limited awareness of available licensed software.
- Dependency on IT team for installation.
- Device compatibility issues.
- License availability limitations.

5. Available Solutions — AS

Which solutions are available to the customers when they face the problem?

- ServiceNow Service Catalog for software requests.
- Manual email / chat with IT team (current process).
- Self-service software installation (if available).
- IT helpdesk support.
- Company software portal (if exists).

Explore (AS – After)

Focus (JA – Just Before)

2. Jobs-to-Be-Done / Problems — J&P

What job do they want to get done?
What problems do they face?

- Get the required licensed software installed quickly and securely.
- Avoid manual communication and follow-ups.
- Know the approval status and installation progress.
- Ensure the software is authorized and compliant.

9. Problem Root Cause — RC

What is the real reason that this problem exists?

- Manual and scattered request process.
- Lack of visibility into request status.
- Unclear approval and assignment process.
- License verification done manually.
- No centralized platform for software requests.

7. Behaviour — BE

How do they behave while addressing the problem and during the job-to-be-done?

- They search for available software and check license needs.
- They contact IT or manager for approvals.
- They follow up multiple times for updates.
- They may feel confused if the process is unclear.
- They prefer a simple and self-service option.

Focus (JU – Up To)

Identify (TR & EM)

3. Triggers — TR

When do they want to engage or start the process?

- When they need to use a new softae for work.
- When their current software is not working.
- When their manager asks them to install a specific tool.
- When they get a new device.

10. Your Solution — SL

How does your solution address the problem and meet their needs?

- Provides a centralized Service Catalog for licensed software.
- Automates approvals and assignment using Flow Designer.
- Verifies license availability before installation.
- Allows employees to track request status.
- Sends notifications at each stage.
- Ensures security, compliance and proper license usage.

8. Channels of Behaviour — CH

a) Online

- ServiceNow Service Portal (Web & Mobile).
- Email notifications.
- In-app notifications.

b) Offline / Other

- Direct support from IT team (if needed).
- Phone or chat (in rare cases).

Enable (CH & IE)

Outcome / Goal: A simple, fast, secure and trackable process for employees to request, get approval, and install licensed software through the Service Catalog.
